***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Inaguma (U.S. 2003/0002210). Inaguma discloses a thin film coil including: a spiral first coil L2 formed on a substrate 1, the first coil being wound around an axis perpendicular to an in-plane direction of the substrate, the first coil having a width that varies in a direction parallel to the axis, the first coil having an end surface having a greatest width, the end surface being located opposite to the substrate (paragraph 0068 – lines 3 to 8); a second coil L1 formed in a region between windings of the first coil; and an insulating wall 12 which isolates the first coil from the second coil. The coils may be formed by a method such as plating (paragraph 0079).

***Allowable Subject Matter***

3. Claims 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
